

May 19, 2010

The Honorable David Obey, Chair  
Subcommittee on Labor, Health and Human Services (HHS),  
Education and Related Agencies  
Committee on Appropriations  
H-218 U.S. Capitol  
Washington, DC 20515

We are writing to request increased funding for the Substance Abuse Prevention and Treatment (SAPT) Block Grant within the Labor, Health and Human Services, Education and Related Agencies FY 2011 appropriations bill. The Administration's FY 2011 proposed budget includes no increase for this vital funding stream – the only federal safety-net program distributed to all States and Territories for lifesaving alcohol and drug abuse prevention, treatment and recovery services. As a result, please work to secure an increase of \$210 million for the SAPT Block Grant in FY 2011.

According to the Substance Abuse and Mental Health Services Administration's (SAMHSA) National Survey on Drug Use and Health (NSDUH), approximately 23.1 million Americans aged 12 or older needed treatment for an alcohol or illicit drug problem in 2008. During the same year, only 2.3 million received of treatment for a problem related to the use of alcohol or illicit drugs at a specialty facility. As a result, approximately 20.8 million people needed but did not receive services in 2008 in a specialty facility.

The SAPT Block Grant has been shown to be an effective and efficient program. According to SAMHSA's proposed FY 2011 budget justification, individuals receiving services from SAPT Block Grant funded programs demonstrated high abstinence rates at discharge from both illegal drug (73.7 percent) and alcohol (78.2 percent) use. An independent and comprehensive evaluation of the program released in June 2009 (see <http://www.tie.samhsa.gov>) found that the SAPT Block Grant ensures accountability through State-federal communication, program monitoring, and data reporting – including information on the impact services have on jobs, housing, criminal justice activity, and more.

Twenty percent of the SAPT Block Grant is dedicated to funding much needed substance abuse prevention services. On average, the SAPT Block Grant set-aside represents the single largest source of prevention funding – 64 percent – for State substance abuse agencies across the country. In twenty-one States, the set-aside represents 75 percent or more of the agency's prevention budget.

The proposed FY 2011 budget includes no increase for the SAPT Block Grant, which was funded at approximately \$1.79 billion in FY 2010. While the Appropriations Committee should be commended for its work to ensure a \$20 million increase to this program in FY 2010, an additional \$403.7 million above the FY 2009 funding level was needed simply to maintain substance abuse services at FY 2004 levels (estimate by NY Office of Alcoholism and Substance Abuse Services [OASAS]). As a result, please work to secure an increase of \$210 million for the SAPT Block Grant in FY 2011.

Thank you very much for your consideration.

Signed
