

CASE TO CARE MANAGEMENT TRAINING

FOR PROVIDERS WHO WORK WITH CHILD AND ADOLESCENT POPULATIONS

Case to Care Management Training — Child from the National Council for Mental Wellbeing takes a deep dive into current health care trends impacting care providers who work with children and adolescents, to equip them with the key concepts needed to serve children and their families in a whole health approach that supports overall care management.

Navigate the changing health care marketplace and manage the whole health of children and adolescents receiving care.

RECOMMENDED FOR:

Case Managers, Care Managers, Care Coordinators, Peer Support Specialists and Nursing Staff

All Direct Care Staff

Organizational Leaders

Supervisors

TIME COMMITMENT:

This training includes live training, conducted virtually or in person, and on-demand webinars. The total time commitment is **7 hours**.

CLASS SIZE:

Up to **60** participants

What is covered?

Courses are fully customizable based on organizational and participant needs.

- **TOPIC 1: Working with Children vs Adults** — Highlight why working with children and youth is different than working with adults.
- **TOPIC 2: World View for Children and Youth** — Challenges confronting children, youth and families in the world they live, and approaches that can support and engage them. Understanding the current world through the data about adolescent and child mental health.
- **TOPIC 3: Foundations of Care Management** — How foundational components of care management apply to family and community connections, recovery and trauma in whole health.
- **TOPIC 4: Whole Health Approach to Development** — Basic brain science, the impact of trauma on the mind and body and interventions that help.
- **TOPIC 5: Building a Model of Care** — How to build a model of care that works for children, youth, CCBHCs and more.
- **TOPIC 6: Team-based Care** — How team-based care supports a care-management approach; how and why the functions and components of care management can and should be distributed across the team.
- **TOPIC 7: Data-informed Care** — Why being data informed is critical in a care management approach and how teams can use data in their care.
- **TOPIC 8: Care Coordination** — Developing strategies to partner with children, youth and their families.
- **TOPIC 9: Identifying Healthy Behaviors** — Understand healthy behaviors, their role in overall health and how to support health behavior change within families.
