

NATIONAL SUMMIT

Leveraging Technology
to Improve Access to Addiction Care

Hyatt Regency Capitol Hill
Regency A
Washington, D.C.

MONDAY, SEPTEMBER 16, 2019 | 7:30 AM - 12:15 PM

Consensus Statement: Technology has proven to increase engagement of people with substance use disorders (SUD), improve access to treatment and recovery services, and ensure quality of care. Full implementation of tech-focused services by systems leaders, health care professionals, payers and users are necessary to ensure successful adoption.

Specifically, Prescription Digital Therapeutics (PDT), regulated through the FDA and validated through clinical trials, uses software applications as a new approach to disease management, including SUD clinical treatment and movement toward recovery. To create greater access to PDT by both clinicians and patients, we advocate for an urgent evaluation of the need to cover these innovations through public and private health insurance plans.
