LAYOUT

Hubspot – <http://offers.hubspot.com/how-to-create-infographics-in-powerpoint>

-Free infographic templates to use in PowerPoint; instructions included

There are a number of websites that offer free, prepackaged layouts for creating infographics. I generally shy away from using these, as the sites restrict many functions in their free versions and don't guarantee the privacy of the data used. Additionally, the products they create are usually not editable once downloaded and have a watermark with the company name at the bottom. I recommend checking them out for inspiration, but then creating your own layout.
