

# Health Equity ECHO

**Lead:** Center of Excellence for Integrated Health Solutions (integration@thenationalcouncil.org)

The goal of this ECHO series is to provide participants with the opportunity to increase Diversity, Equity, and Engagement (DEE) knowledge for the benefit of their organizational DEE initiatives and work with their clients/participants and their staff. Through this 6-month program, organizational teams will have the chance to engage with other health provider organizations in peer-to-peer learning and discussions around improving health equity within their organizations. Each session will consist of a brief didactic presentation on key issues followed by a discussion around an organizational case with actionable recommendations.

Sessions were held from February 2021 – July 2021.

Session	Topic (Click on Title for Presentation Slides)
Session 1	<a href="#">Diverse and Equitable Hiring Practices</a>
Session 2	<a href="#">Creating a Safe and Secure Environment for Staff and Clients</a>
