KEY FINDINGS

1. **Demand for behavioral health organizations’ services has continued to increase.** Three quarters of members (78%) say demand for their organization’s services have increased over the past 3 months. Over the past year, since August 2020, this percentage has increased 26%. Demand has specifically increased over the past 3 months for organizations offering mental health treatment, crisis services, social support services, and youth services.

2. **Increased demand is causing patient waitlist to grow.** Three in five (62%) member organizations say their patient waitlist has grown over the past 3 months, a 17% increase since February 2021.

3. **Organizations are having trouble recruiting and retaining employees.** Nearly all member organizations surveyed (97%) say it has been difficult to recruit employees, including 78% who say it has been *very difficult*. In an open-end question, organizations say the main obstacles they’re facing recruiting employees include a lack of applicants overall, specifically a lack of qualified applicants, along with being able to offer a competitive salary and burnout from COVID-19.

4. **When asked about short-term policy solutions to meet increased demand, member organizations reference additional funding to hire qualified staff, continuing to offer telehealth services, updating reimbursement rates, and reducing the amount of paperwork/regulation that causes a burden to staff.**

**Methodology**

This poll was conducted between September 8-23, 2021 among a national sample of 260 NCMW Members. The interviews were conducted online. Results from the full survey have a margin of error of plus or minus 6%. 
AGENDA

COVID-19 IMPACT ON STAFF

COVID-19 IMPACT ON SERVICES

DEMOGRAPHICS
Nearly all member organizations surveyed (97%) say it has been difficult to recruit employees, including 78% who say it has been *very difficult*.

Overall, how easy or difficult is it for your organization to recruit and retain employees right now?

Four in five member organizations (82%) say it has been difficult to retain employees.

Recruit employees:
- Very easy: 19%
- Somewhat easy: 78%
- Somewhat difficult: 27%
- Very difficult: 82%

Retain employees:
- Very easy: 16%
- Somewhat easy: 55%
- Somewhat difficult: 27%
- Very difficult: 82%
When asked what obstacles they’re facing in recruiting employees, organizations reference the lack of applicants, specifically the lack of qualified staff, being able to offer competitive pay, and the impact of COVID-19 related stress on staff.

What are the main obstacles your organization faces in recruiting employees?

**ORGANIZATIONS WHO SAID IT IS DIFFICULT TO RECRUIT EMPLOYEES, N=254**

**LACK OF APPLICANTS**
- "Lack of applicants, lack of applicants willing to work, people afraid of Covid, going to work in other fields, pay too low."
- "Lack of applicants. Lack of qualified applicants. Lack of applicants of diversity."
- "No applicants despite increased advertising on multiple websites & platforms. We presented at local colleges & universities, connected with Indiana Dept. Workforce Development, and reached out to former/retired employees. Nothing seems to increase the applicant pool."
- "We’re getting very few applicants. When we contact the applicants to schedule an interview, most aren’t returning our calls. When they show and we offer a job, many are turning down the offer."

**SALARY/PAY**
- "Others have increased salaries and we are not able to compete."
- "As a small nonprofit, we have a hard time competing on the salaries big organizations or governments can offer."
- "Our pay scale is outdated due to no cost of living increases in our State contracts for 30 years."
- "Compensation level is low for entry level, and challenging, positions. Individuals can make the same, or more money, doing jobs not near as difficult/dangerous."

**QUALIFIED STAFF**
- "We are having to hire more bachelors level clinicians to meet consumer needs but then leaves us short staffed for on-call crisis services."
- "Lack of qualified applicants, especially for clinical positions. Unable to pay competitive wages given current funding levels. Unable to find clinicians who are willing to work face to face, on site."
- "Workforce shortage, people have left the SUD field due to low pay and benefits and there are new people entering field. This is due to historically low reimbursement rates that have forced agencies to pay low wages and people to find other sources of work."
- "There is a shortage of clinicians at every level. Additionally, we run a program for Spanish speaking clients and it is extremely difficult to find qualified counselors."

**COVID-19 BURNOUT**
- "High caseload and high acuity clients can lead to burnout."
- "Burnout from providing prolonged virtual behavioral health services."
- "Diverse student body of highly qualified candidates."
- "COVID related stress and burnout of staff makes retention difficult."
The most common hiring incentive member organizations are currently offering is a signing bonus (46%), however 30% are not currently offering hiring incentives.

Is your organization currently offering the following hiring incentives? Please select all that apply.

- **Signing bonus**: 46% Selected, 54% Not Selected
- **Educational funds**: 37% Selected, 63% Not Selected
- **Other, please specify**: 30% Selected, 70% Not Selected
- **Loan repayment**: 29% Selected, 71% Not Selected
- **None of the above**: 30% Selected, 70% Not Selected

Other wrote in: • Referral bonus • Retention bonus • Paid training for CEUs • Loan repayment
Organizations not offering hiring incentives say they are not because they cannot afford to, are unsure of the effectiveness of incentives, and the impact offering incentives would have on current staff.

Why is your organization not currently offering hiring incentives?

- Increased a lot: 40%
- Increased some: 38%
- Stayed about the same: 20%
- Decreased some: 3%
- Decreased a lot: 3%
Organizations top concerns in meeting increased demand include staff burnout and shortages, having qualified staff, and being able to meet client needs in a timely manner.

You mentioned demand for your organization’s services has increased over the past 3 months. In a few words, what are your top concerns in addressing the increase in demand?

**DEMAND FOR ORGANIZATION’S SERVICES INCREASED, N=202**

**STAFF BURNOUT**

“We’ve closed intakes for new patients because staff are at full capacity therefore having to turn down services to people in need. Staff are burning out, have high case loads, and are covering for others.”

“We've closed intakes for new patients because staff are at full capacity therefore having to turn down services to people in need. Staff are burning out, have high case loads, and are covering for others.”

“Caseloads are too high and supervision loads are too large. People are overwhelmed and overworked, leading to more turnover and burnout.”

**STAFFING SHORTAGES**

“We have the highest number of openings in our 30 year history, currently 10% of our workforce. Applications are not coming in at the normal rate and candidates that we do find are turning our offers down for higher pay - typically 15% or more higher. With colleges not being in person last year, we also have a smaller pool of new incoming people starting their careers.”

“We don't have enough staff including MD, masters level clinicians, case managers, and peers. We don't have many linkage and referral options because other CMHCs are in the same position.”

**QUALIFIED STAFF**

“The current staff are overburdened with having to cover for the open positions that we have. Being able to address the increased demand adds to this. Staff are overly stressed, overwhelmed, and tired.”

“We've closed intakes for new patients because staff are at full capacity therefore having to turn down services to people in need. Staff are burning out, have high case loads, and are covering for others.”

“Staff turnover often creates a gap in services for people, this gap than creates a cycle of clients cycling through services. This has also created an increase in individuals accessing crisis services.”

**CLIENT NEED**

“The volume of people requesting services has increased slightly but the level of distress and crisis that people are experiencing is infinitely higher. We see more people in severe crisis due to homelessness, substance abuse and lack of hope. In our rural community, we don’t have much in the way of housing or housing supports.”

“The current staff are overburdened with having to cover for the open positions that we have. Being able to address the increased demand adds to this. Staff are overly stressed, overwhelmed, and tired.”

“Clients not receiving mental health care in a timely manner.”
When asked what short-term policy would help organizations meet increased demand for services, members reference additional funding, continuing funding for telehealth services, updating reimbursement rates, and reducing paperwork requirements.

What short-term policy or regulatory relief would be helpful for your organization to meet the increased demand for your organization’s services?

**DEMAND FOR ORGANIZATION’S SERVICES INCREASED, N=202**

<table>
<thead>
<tr>
<th>ADDITIONAL FUNDING</th>
<th>TELEHEALTH SERVICES</th>
<th>REIMBURSEMENT RATES</th>
<th>PAPERWORK/REGULATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Increased funding that would support staff pay raises and bonuses.”</td>
<td>“Continue to allow for full telehealth services, access and billing for such services. We need this flexibility.”</td>
<td>“Increases in reimbursements for Medicaid and Medicare, differentiation in reimbursement for telephonic, virtual and in-person services (there are differences in the amount of risk staff are taking), relief funding that doesn’t come with so many strings and regulations that we essentially need to hire additional accounting staff to do reporting.”</td>
<td>“Lower requirements for some of the billable codes, increased rate of payment from Medicaid and Medicare, less paperwork for our agencies to have to complete, more money to improve technology.”</td>
</tr>
<tr>
<td>“Increased funding to attract AND maintain excellent team members...we need more team members, but are not willing to just get bodies...we need the resources to also train team members to deliver the level of quality services the community is accustomed to and should expect.”</td>
<td>“Continue to fund telehealth services fund substance abuse programming at the same rate as mental health services.”</td>
<td>“This is not a short-term policy fix. Reimbursement rates are not high enough to justify necessary pay increases.”</td>
<td>“We have lost staff due to increased paperwork requirements with Medicaid. Staff have other options where they don’t have to spend hours on paperwork. Getting staff to work for a CMHC when there are so many other options without all the requirements.”</td>
</tr>
</tbody>
</table>
Organizations offering mental health treatment, crisis services, social support services, and youth services are most likely to say demand for these services has increased over the last 3 months.
