

# Roundtable with MTM Experts: Implementing Rapid Change in the COVID Era

Tuesday, May 12 - *Part 1 of 2*

# Implementing Rapid Change in the COVID Era

---

## Roundtable with MTM Experts

- **Charlie Grantham** – setting up your telehealth home office and maintaining HIPAA compliance
- **Michael Flora** - introducing consumers to collaborative documentation in a telehealth environment
- **David Swann** - creating an optimal telehealth environment and effectively addressing challenges, including a crisis

# Telehealth in the Home Office

## Telehealth Tips for Professional, Productive, and Technologically Transparent Provider Performance

Charlie Grantham

IT and Process Optimization Consultant

**Scott Lloyd**  
President

**Michael Flora** M.B.A., M.A.Ed., L.P.D.C., L.S.W.  
Lead Operations Consultant

**Annie Jensen** M.S.W., L.C.S.W.  
Process Change Consultant

**Joy Fruth** M.S.W.  
Lead Process Change Consultant

**David Swann** M.A., L.C.A.S., C.C.S., L.P.C., N.N.C.  
Senior Integrated Healthcare Consultant

**Charlie Grantham**  
IT and Process Optimization Consultant

**David Lloyd, Jr.**  
Operations and Process Optimization Consultant

**Jennifer Hibbard**  
Operations Consultant

**Valerie Westhead** MD  
Medical Operations Consultant

**Julie Arment**  
DLA-20 and Process Change Consultant

**Willa Presmanes** M.Ed., M.A.  
Medical Necessity Expert and Co-Author of the DLA-20

**Mike Garrett**  
Lead Statewide Implementation Consultant

**Rhett Melton**  
Associate Consultant

**Kyle Caron**  
Associate Consultant

**David Lloyd**  
Founder

**Jodie Giboney**  
Director of Operations

**Jennifer Senechal**  
Financial Controller / Cost and Revenue Consultant

# Setting the Scene is Critical

## Camera Position and Lighting

- Camera Position
  - Optimal position is directly in front of face to slightly elevated
  - Avoid low camera angles
  - Landscape!
- Lighting
  - Optimal lighting is multiple diffused light sources
  - Watch out for reflections
  - Avoid bright backlighting

# What's that behind me?

## The Camera's Eye

- Background
  - Be mindful of what is behind you
  - Also, who is behind you
  - Virtual Backgrounds can be distracting
  - Using Virtual Backgrounds in a positive way

# Can you hear me now?

## Hearing and Being Heard

- The importance of audio
  - Audio is either 50% or 100% of telehealth
  - Whatever technology you choose, make sure it is comfortable
  - Have a Backup!
- Keeping Conversations Private
  - Speak in low tones, close the door
  - Avoid the use of speakerphone mode

# Making it work.

## Tips for Staff and Clients alike

- Video Tips
  - No one likes “Shaky Cam”
  - Consider inexpensive tripods or phone mounts for phones
- Audio Tips
  - Audio problems will happen, be ready for them
  - Sound Transmission
  - Notification reduction methods

# What are other Technology Related considerations?

## A dispersed workforce can increase risk.

- Keep devices up to date
- Change default passwords
- Reboot equipment regularly
- Additional security measures
- Have a backup plan

Michael Flora, MBA, M.A.Ed., LCPC

# Conducting Your Session Using Collaborative Documentation: In a Telehealth Environment-

Presented by:

Michael D. Flora, MBA, M.A.Ed., LCPC

Senior Operations and Management Consul

[Michael.Flor@mtmservices.org](mailto:Michael.Flor@mtmservices.org)

[www.MTMservices.org](http://www.MTMservices.org)

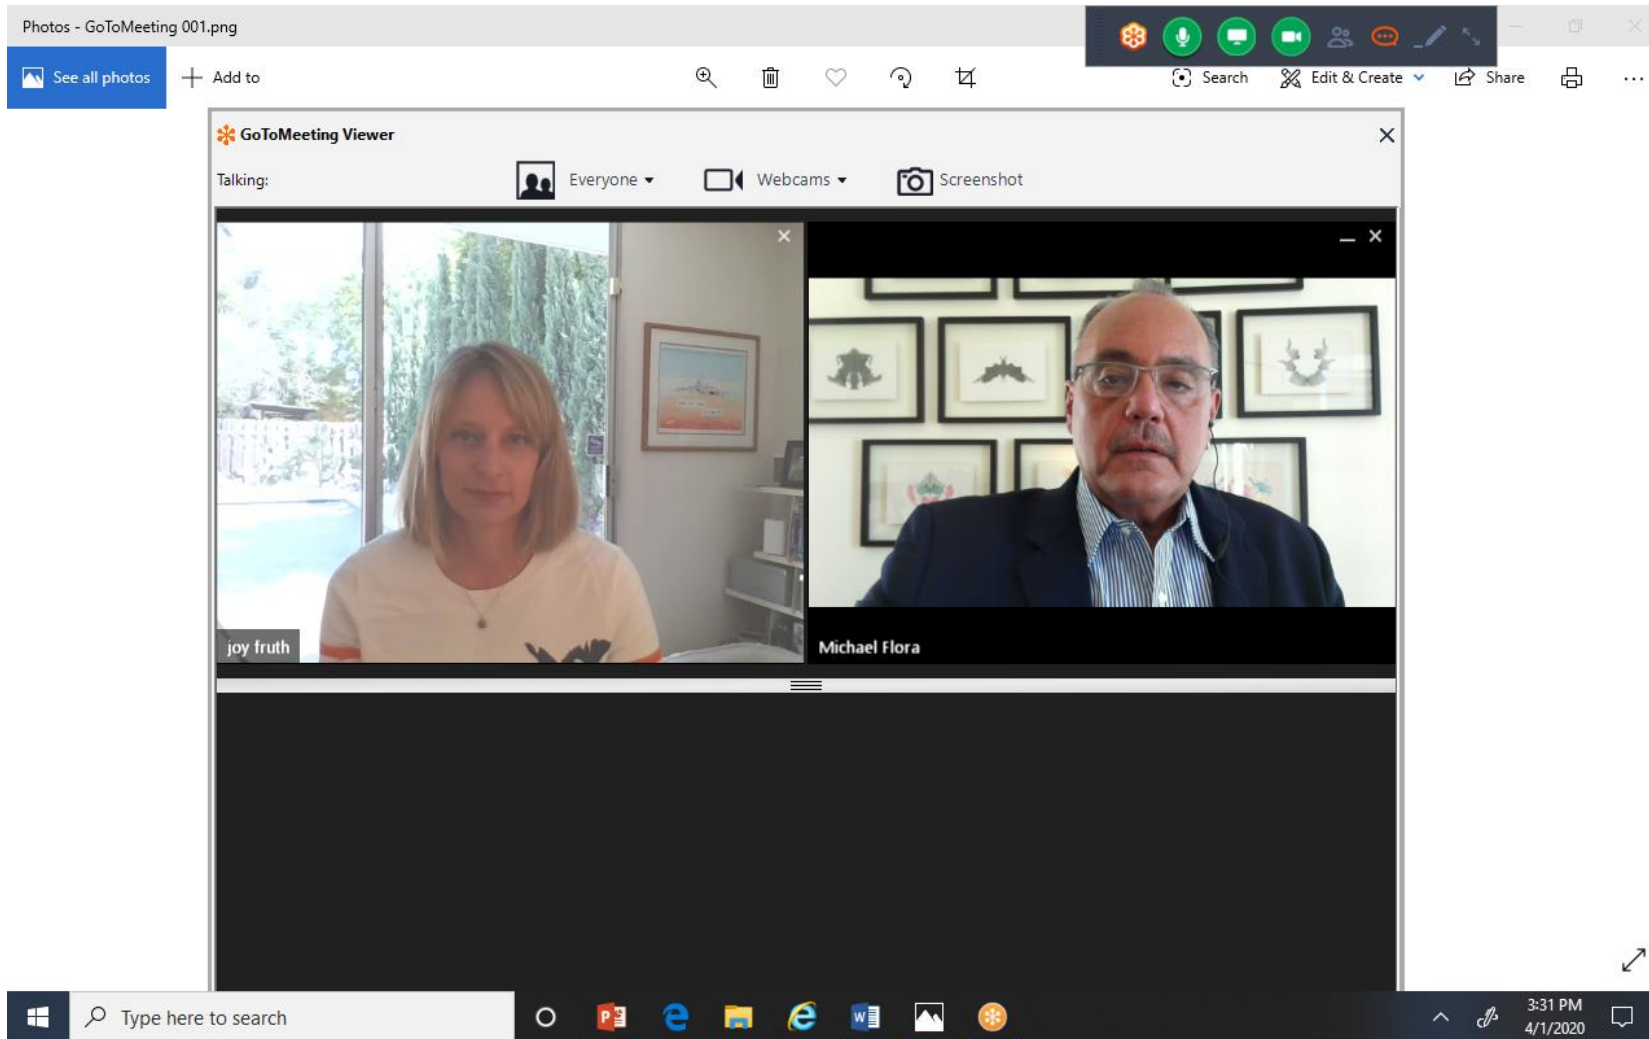

# Tips for Collaborative Documentation in a Remote or Telehealth Environment

## The Set up

- Review the goals and objectives for today's session
  - “Golden Thread”
- Know your equipment
- Practice in supervision or with a peer
- Develop your scripts on how you will introduce the new session format
- Introduce the client format of the session, telephonic, video
- Then....

# Conduct your session like you normally would

# Pull up your note at the end of the session

# Collaborative Documentation

## Remember....

- **Technology** – Technology is great when it works but you must always have a back-up plan.
- **Do as much as you can** - Completing a portion of the note in session as you are starting out is okay; simply move to do more each time.
- **Clinical Judgment** - Collaborative documentation will not work with every client in every situation.

# Preparing for Crisis Events and Other Unique Circumstances When Using Telehealth

## Quality, Safety, Standards of Care and Effectiveness

David R. Swann, MA, LCAS, CCS, LPC, NCC

Senior Healthcare Integration Consultant

# Setting Telehealth Expectations

## Screening and Preparation Help Reduce Avoidable Circumstances

- Client's new to Telehealth will follow your lead and model your behavior. We need to be helpful!
- Inquire if the client has had a previous experience with Telehealth either in primary care or behavioral health care. Use any experiences to helpful and engaging.
- The safety, quality, client protections and standards of care expected from Telehealth are no different that what is expected from in-person care.
- Begin setting Norms early on to avoid challenges. Appearance, use of the technology, confidentiality, privacy at location, language, threats should be considered.
- Engagement, Motivational Interviewing and CBT techniques are frequently found through research to be successful via Telehealth.

## As Best You Can – Prevent

---

A negative experience with one client in the group can have an impact on the other members of the group

This risk is multiplied by the number of group members

Orientation can help prevent problems

# Group Norms for Telehealth Groups

---

**Anticipate and Get Ahead of Problems By Setting Norms and Rules**

## **Privacy and Confidentiality for Patient**

- Strongly encourage (mandate) patients to arrange for a private space to attend the group via Telehealth.
- Inform others in the (home, location) to avoid disturbing the group member during the group.
- Do not disturb sign on door.

## **Clothing and Appearance**

## **Attendance and Participation Norms**

## **Practice with Technology at least once**

## **Norm Plan for Technology Failure**

# Unique Circumstances

## Pre-arranged Emergency Contact May Be A Solution

- Think ahead through the treatment to plan the Telehealth service and plan for unique circumstances.
- In the unusual circumstance that an escalation in behavior occurs to where the patient needs someone with them, and they are in their home alone, a pre-arranged contact would be helpful that you already have secured permission to contact.
- Another intervention may be to have a “hosted” Telehealth service with a peer support or case manager/coordinator with the patient observing all CDC guidelines.
