

What are Your True Operating Costs?

Presented By -

Scott Lloyd, President of MTM Services
Senior National Council Consultant & Chief SPQM Data Consultant

Asha Patel, BS, Director of Business Operations -
Labette Center for Mental Health Services

What are Your True Operating Costs?

Asha Patel, BS, Director of Business Operations -
Joined Labette Center for Mental Health Services in 2006.
Became the Office Manager in fall of 2015.
Director of Business Operations in July of 2017.
Bachelors of Business Administration (BBA) degree in Management and Accounting.

What are Your True Operating Costs?

Scott Lloyd

President of MTM Services, Lead SPQM Data Consultant and Senior National Council for Mental Wellbeing Consultant

- 10 years in a private-for-profit industry
- 24 years in the CBHO, CSB, CCBHC environment (Since 1998) working with an amazing team of consultants
- Has worked with more than 1,000 organizations in 48 states, Washington, DC, and 2 foreign countries in all service disciplines
- The data in this presentation is tied to that experience working to help teams make substantive change every day

Experience –

Improving Quality in the Face of Healthcare Reform

“Working to help organizations deliver the highest quality care possible, while improving the quality of life for those delivering the care!”

- MTM Services' has delivered consultation to over 1,000 providers (MH/SA/DD/Residential) in 49 states, Washington, DC, and 2 foreign countries since 1995.
- **MTM Services' Access Redesign Experience** (Excluding individual clients):
 - 5 National Council Funded Access Redesign grants with 200 organizations across 25 states
 - 10 Statewide efforts with 216 organizations
 - Over 15,000 individualized flow charts created
- Leading CCBHC Set up and/or TA efforts in more than over 30 states across the country since the program's inception.

Using the Value of Care Equation for Good

MTMSERVICES.ORG SPQM

Resetting our Reality...

Most Teams Already Know What To Do...

Why do some organizations achieve success while others continue to struggle?

20 health tips for 2020

1. Eat a healthy diet.
2. Consume less salt and
3. Reduce intake of harm
4. Avoid harmful use of a
5. Don't smoke.
6. Be active.
7. Check your blood pres
8. Get tested.

MTMSERVICES.ORG SPQM Scott.Lloyd@mtmservices.org 7

Resetting our Reality...

We Need STAFF!!

"Frank just up and exploded. I hope I never get that burned out."

Picture Source – <http://org.osu.edu/cprpou/2019/10/31/burnout/>

1. **Current labor market is the worst I have seen in my 24 years**
 - Average teams we are working with have 35% of their spots open, including administrative positions
 - Losing staff to places that we have never had to compete with!
 - The great assumption...**
2. **Primary factors for burn out –**
 - Paperwork, Paperwork, Paperwork!! – Post session in particular
 - Unrealistic productivity expectations (*Don't irradiate Productivity Guidelines..*)
 - *Overbearing Nonbillable Duties*
 - *Don't like their leaders*
 - *Low pay/lack of opportunities for growth/bonuses*
3. **What to Do About it?!**
 - Documentation Redesign/Data Mapping/Collaborative Documentation
 - Stay plugged in – (When is the last time you did an assessment?)
 - Realistic Productivity Expectations
 - Remove Other Areas of System Noise

MTMSERVICES.ORG SPQM Scott.Lloyd@mtmservices.org 8

Resetting our Reality...

As We Move to CCBHCs / Higher Funding Environments

Hiring more low producing staff without fixing the issues that cause your current staff to struggle is NOT a sound strategy...

Resetting our Reality...System Noise Impacts

Productivity is not a measure of how hard our staff are working....

It is a measure of how well our systems are supporting our staff!

Breaking down cost versus revenue by modified code –
 Crucial for CCBHC rate setting versus the CMS Tool that gives a system wide cost.

MTMSERVICES.ORG **SPQM** Cost Per Hour Ranges

Salary	FB%	Salary + FB	Overhead %	Total Pay
\$32,000.00	32%	\$42,240.00	44%	\$60,825.60

Hours per Day	Work Days PY	Days of PTO
8	260	31

Direct Service Hours	OS%	Cost Per Hour	Revenue	Margin
100	4.8%	\$608.26	\$87	(\$521.26)
200	9.6%	\$304.13	\$87	(\$217.13)
300	14.4%	\$202.75	\$87	(\$115.75)
400	19.2%	\$152.06	\$87	(\$65.06)
500	24.0%	\$121.66	\$87	(\$34.66)
600	28.8%	\$101.38	\$87	(\$14.38)
700	33.7%	\$86.89	\$87	\$0.11
800	38.5%	\$76.03	\$87	\$10.97
900	43.3%	\$67.58	\$87	\$19.42
1000	48.1%	\$60.83	\$87	\$26.17
1100	52.9%	\$55.30	\$87	\$31.70
1200	57.7%	\$50.89	\$87	\$36.11

Incorrect Examples			
All Hours	2080	100.0%	\$29.24 \$87 \$57.76
AH Minus PTO	1832	88.1%	\$33.20 \$87 \$53.80

Avg Reimbursement: \$87

Making the Value of Care Equation Work –

How did we get to here?!

System Noise –
*Anything that keeps staff from being able to do the job they want to do:
 Helping consumers in need!*

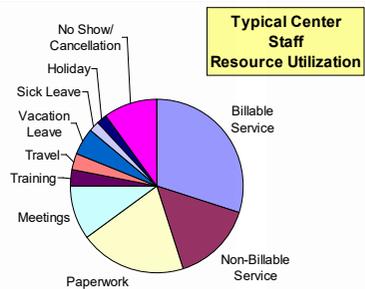

More Importantly, what do you do about it!?

Resetting our Reality...

Change - (Verb) - Alter, vary, modify. To make or become different. **Change** implies making either an essential difference often amounting to a loss of **original identity** or a **substitution of one thing for another**.

Making the Value of Care Equation Work –

How did we get to here?!

Substitute Process is Key!

Why the "Value" of Care Equation Came About

Quality Is Often Confused With How Much Narrative We Write...

- That's how and why the value of care equation came to be as everybody kept trying to out quality everyone else (a.k.a. writing more), the result is that we started serving the system/our paperwork more than we were serving our consumers.
- This often leads to staff members taking personal ownership in the processes and/or forms that they create.

Resetting our Reality...

The #1 Reason that Change Efforts Fail -

Teams come into the change process looking to alter what they are doing now instead of looking at what it will take to actually make a substantive change....

Partial Implementation or Cherry Picking the Change...

The best way to overcome this is to tie to a solid change reason with a solid change target...

Bedrock Change Principle....

The "Value" of Care Equation

Services Provided/Quality – Timely access to clinical and medical services, service array, duration and density of services through Level of Care/Benefit Design Criteria and/or EBPs that focuses on population-based service needs.

Cost of Services provided based on current service delivery processes by CPT/HCPCS code and staff type.

Outcomes Achieved (i.e., how do we demonstrate that people are getting "better" such as with the DLA-20 Activities of Daily Living).

Value is Determined based on can you achieve the same or better outcomes with a change of services delivered or change in service process costs which makes the outcomes under the new clinical model a better value for the payer.

Do You Actually Know your Costs?! – Data Examples

MTMSERVICES.ORG SPQM
Driving Transformational Change

The "Value" of Care Equation

The 2 Main Measurable Components Encompass A Lot!

• Quality

- Access to care/Wait times
- Engagement/Show rates
- Adherence to treatment
- An appropriate length of stay
- Outcomes measured with a validated outcomes tool
- Staff's job satisfaction
- Staff turnover rates

• Cost

- Seems easy to measure, but most teams are using a flawed methodology
- Is not a popular topic with clinical staff so is often not addressed
- Because flawed methodologies are used, costing number often do not make sense to staff then they so discuss it
- If you focus on the cost of care, you are often seen as the enemy of Quality

Resetting our Reality...

We Need Accurate Data!

1. Anecdotal data versus accurate data
 - Most teams rely on data based upon their impressions/gut feel
 - Gut feel data often leads to the wrong emphasis points and/or overreactions
 - As David Swann points out – "You should have the same data that your MCOs have about you!"
2. Why use anecdotal data? – On average, 30% of the data in medical records across all medical fields has been deemed inaccurate
 - Who can fix this/Who is entering the data?

Back to our original question, do you actually know your costs?!

Top 5 Signs You Need Better Costing Information

- 1. YOUR TEAM IS NOT HITTING THEIR BUDGET SERVICE TARGETS!**
The average team sees only 30% of their staff actually hit their production target, regardless of the target. Poorly functioning ERs, challenging paperwork and missed appointments keep teams from hitting targets.
- 2. YOUR TEAM'S COLLECTION RATES ARE LACKING!**
You might have the best clinical staff working hard and delivering excellent care. But if you are not able to collect for their work, then what is the point if you are not getting paid, then you can't pay your staff!
- 3. YOU CANNOT IDENTIFY COST PER HOUR FOR DIFFERENT PROGRAMS OR STAFF TYPES!**
Many teams do not know this. And they don't have a way to break out what they paid staff by the hours they delivered in each program. This should be an automated function in every payroll system.
- 4. YOU DON'T KNOW YOUR TRUE OVERHEAD RATE!**
Required overhead percentages in contracts are usually much lower than actual costs. The average actual overhead rate is 3 - 4 times higher than the standard targets set in contracts.
- 5. YOU DON'T KNOW YOUR COST PER UNIT COST!**
Most teams are using flawed methodologies (in the wrong denominator) to determine cost per hour or event. Others cannot break down staff production to this level. All of this contributes to underestimating true costs.

MTMSERVICES.ORG SPQM
Scott.Lloyd@mtmservices.org
COSTING IS AT THE ROOT OF MOST CLINICAL AND STAFF RETENTION CHALLENGES. MH SERVICES CAN HELP - WWW.MHSERVICES.ORG 25

Top Costing Challenge Points -

- Dividing costs by 2080 hours
- Not including all of your costs
- Using overhead percentages instead of actual costs
- Thinking that your P&L Data is Enough!
- Looking at expected revenue instead of actual revenue
- Including monies outside of *At Risk Funding*

Do You Actually Know your Costs?

Department of Human Services
Division of Mental Health

Do You Actually Know your Costs?

Costing Methodology Review:

Actually Understanding your Costs!

Let's Do the Math!

$$\text{\$40,000} / 2080 \text{ Hours} = \text{\$19.23 An Hour}$$

$$\text{\$30 Per Hour} = \text{\$10.77 Margin Per Hour??}$$

$$\text{\$30} \times 1200 \text{ Hours} = \text{\$36,000}$$

Do You Actually Know your Costs?

Our Costing Methodology Defined –

Total Cost for Service Delivery

- Direct Service Staff Salary
- Direct Service Staff Fringe Benefits
- Non-Direct Costs (All other costs)

Total Revenue for Service Delivery

- Net Reimbursement actually Attained/ Deposited. (This takes into account Denial Rate, Self Pay, Sliding Fee Scale, etc.)

- Divided By -

Total Billable Direct Service Hours Delivered **

- All Direct Service Hours Delivered by Direct Service Staff that are eligible to be billed via a CPT Code or against a Grant.

** Utilizing the common denominator of total Billable Direct Service Hours instead of total hours worked per year assures an apples to apples comparison of an organization's true cost versus revenue per direct service hour.

Do You Actually Know your Costs?

The CMS Costing Tool was Designed to Estimate Costs

CCBHC Cost Report	
MEDICAD ID:	
NP:	
REPORTING PERIOD:	From: To:
RATE PERIOD:	From: To:
WORKSHEET:	CC PPS-1 Rate
PART 1 - DETERMINATION OF TOTAL ALLOWABLE COST APPLICABLE TO THE CCBHC	
Description	Amount
1. Total direct cost of CCBHC services (Trial Balance, column 9, line 29)	\$0
2. Indirect cost applicable to CCBHC services (Indirect Cost Allocation, line 16)	\$0
3. Total allowable CCBHC costs (sum of lines 1-2)	\$0
PART 2 - DETERMINATION OF CC PPS-1 RATE	
Description	Amount
4. Total allowable CCBHC costs (line 3)	\$0
5. Total CCBHC visits* (Daily Visits, column 1, line 4)	0
6. Unadjusted PPS rate (line 4 divided by line 5)	\$0
7. Medicare Economic Index (MEI) adjustment from midpoint of the cost period to the midpoint of the rate period	0.000%
8. CC PPS-1 rate (line 6 adjusted by factor from line 7)	\$0

- Estimates can hide a lot of things!
- Can you see your cost per hour/event by staff?
- Can you see your cost per hour/event by code?
- If not, then how will you know if the PPS rate is going to work?
- Majority of teams have had to rebase their costs at the end of their first year as a CCBHC.

Resetting our Reality...

Key Take Aways for Labette Center

How Labette Center makes the costing report work in the best way possible.

- o The Importance of Providers Meeting Productivity.
- o Making sure all services/cost/revenue is included in the calculator.
- o Separating direct and indirect costs.

What Labette Center gets from having an effective and accurate costing report.

- o Being able to view results down to individual providers.
- o Having the ability to break down the impacts of all funding sources.
- o The True Cost of being a Community Mental Health Center in Labette County.

Resetting our Reality...

A Successful Change Should Benefit You, Your Consumers and Your Staff!

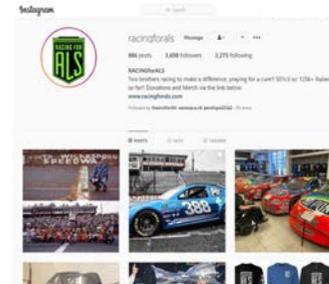

Changes Should...

- Reduce Repetition / Extraneous Data Capture
- Reduce Time to Care
- Reduce Documentation Time
- Reduce Staff Turnover
- Reduce Billing Errors
- Reduce Miscommunications
- Reduce Management's Time in Decision Making by Building Leadership
- Reduce Costs

All of these changes will converge to increase the Quality of Care and your Staff's Job Satisfaction.

Using Data to Make Change Happen!

How Does/ Does Your Team Use Data?!

Over \$400,000 raised for ALS Research - @RacingForALS

Anecdotal Data - Which Car Would You Choose?
