Introductions

Carolyn Rekerdres, MD
Medical Director, East Texas Behavioral Health Network, NE Region, National Council for Mental Wellbeing, Medical Director Institute

Christina Arredondo, MD
Medical Director of Behavioral Health, El Rio Community Health Center, National Council for Mental Wellbeing, Medical Director Institute

Shauna Reitmeier, MSW, LGSW
CEO, Northwestern Mental Health Center, National Council for Mental Wellbeing, National Board
Introductions

Danica Love Brown, MSW, PhD  
*Choctaw Nation of Oklahoma*  
Northwest Portland Area Indian Health Board, Behavioral Health Programs Director

Kait Hirchak, PhD  
*Eastern Shoshone*  
Assistant Research Professor, University of Washington

Thomasine Heitkamp, MSSW  
Professor, University of North Dakota

Dennis Mohatt, MA  
Vice President for Behavioral Health, Western Interstate Commission for Higher Education
Why Rural Health Integration?

Rural Communities face a unique set of challenges and health inequities that are not seen in urban communities (transportation, internet and infrastructure, distance to provider, workforce shortages, etc.). Approximately 63% of Primary Care Health Professional Shortage Areas are in rural areas and related to mental health and substance use treatment services, 65% of rural areas do not have a psychiatrist, and 47% do not have a psychologist.

Goal of this ECHO:
To bring together industry leading experts and rural health organizations to explore challenges, innovative opportunities, and evidence-based solutions to address health disparities within rural communities, including workforce shortages, access to care, and other social determinants of health. Through a safe and supportive environment, ECHO supports peer-to-peer learning, and interactive training and education to promote knowledge growth and generate long term strategies.

What is ECHO?

(Extension for Community Healthcare Outcomes)

Project ECHO is a revolutionary guided-practice model that reduces health disparities in under-served and remote areas of the state, nation, and world. Through innovative telementoring, the ECHO model uses a hub-and-spoke knowledge-sharing approach where expert teams lead virtual clinics, amplifying the capacity for providers to deliver best-in-practice care to the underserved in their own communities. Learn more: https://hsc.unm.edu/echo/
Engagement is Key

**ECHO Host Team and Faculty**

- Lead all presentations and discussions
- Be present and prepared
- Be on video
- Engage in the open discussion
- Provide ECHO charter and curriculum
- Share slides and case presentation information prior to session
- Share any additional information or guidance as requested by participants

**Participants**

- Join every session
- Be on video
- Engage in the open discussion
- Share your expertise
- Use the chat box
- Share your learnings with your team
- Share feedback and suggestions with us
Safe Space Guidelines

Setting the Foundation
• We have been socialized to believe that it is not polite and not always comfortable to talk about health and racial equity and social determinants.
• We ask ourselves and participants to be mindful of assumptions and biases during this presentation.
• We ask ourselves and participants to be aware of multiple identities, backgrounds and perspectives in our virtual space.

Requests
• Be present & avoid multi-tasking
• Respect
• Listen to understand
• Time Out
• One person speaks at a time
Poll #1: What best describes your role?

- Clinician
- Administrator
- Policy Maker
- Payer
- Other (specify in chat box)
Poll #2: What best describes your organization? (check all that apply)

• Primary Care Provider

• Mental Health Provider

• Substance Use Disorder Provider

• Other (specify in chat box)
Joining from all across the nation!
Who is in the Room?

Share in the chat your Name, Title, Organization and State
Didactic Presentation:

Identifying Equitable Approaches and Providing Culturally Responsive Services to Those Most in Need in Rural Communities

Danica Love Brown, PhD, MSW, CACIII
Choctaw Nation of Oklahoma
Northwest Portland Area Indian Health Board
Behavioral Health Manager

Kait Hirchak, PhD, MHPA
Eastern Shoshone Tribe
Elson S. Floyd College of Medicine
Washington State University
Learning Objectives for Today

After this webinar, participants will be able to:

• Understand which populations in rural communities are most in need and experience greater barriers to quality comprehensive services.

• Understand and describe the importance of providing culturally responsive services in rural communities.

• Describe an example of a culturally responsive strategy to support tribal communities and understand how this strategy can be translated to support other communities.

• Discuss and share examples of culturally responsive strategies for supporting those most in need in rural communities through the case presentation discussion of today’s session.
Northwest Portland Area Indian Health Board

To assist Northwest tribes to improve the health status and quality of life of member tribes and Indian people in their delivery of culturally appropriate and holistic health care.
Health Inequities Across Diverse Rural Communities

- Communities of color have greater barriers to accessing healthcare services
- Worse healthcare outcomes among rural diverse communities
- The American Public Health Association and the CDC have declared racism/structural racism a public health crisis

Importance of Providing Equitable and Culturally Responsive Services

- Reduces health disparities
- Increases healthcare quality, engagement, and satisfaction
- Improves health outcomes among diverse communities
Culture & Cultural Humility

- It normalizes not knowing
- It helps you identify with your coworkers
- It helps you identify the needs of your “client”
- It creates a culture of understanding that can spread beyond work
Populations in rural communities that would benefit from culturally responsive services

Populations/individuals who identify as:

- Native Americans, tribal communities & indigenous populations
- Speakers of other languages
- Migrants & refugees
- Latinx/Latino populations
- Asian communities
- Black/African American populations
- Individuals who are LGBTQ+
- Individuals with disabilities
Example of Cultural Responsiveness: Tribal Opioid Response Agenda

- The goal of the Tribal Opioid Response Agenda is to support tribal communities in healing our relatives and relations.
- We have worked alongside tribal policymakers, national experts, service providers, and community members, developed this strategic agenda.
Recommendations based on:

- Feedback gathered
- Advice from tribal policymakers and community members
- Insights from national and regional experts
- Feedback from people living with opioid use disorder
TOR Strategic Agenda

Recommendations are:

• Practical
• Span a wide breadth
• Including 7 Key Action Areas that can result in measurable progress
Growing the Evidence Base for Effective Tribal Opioid Interventions

• Invest in the development of culture-based prevention, treatment, and recovery approaches to OUD

• Grow the evidence and practice base on AI/AN substance use during pregnancy
Encourage clients to participate in Indigenous healing practices and cultural traditions to support their overall health and wellness.

Incorporating Traditional Indigenous Knowledge in treatment settings and interventions that are grounded in Indigenous knowledge
Wellness
Sacred Tree: Four Worlds International Institute.
https://www.fwii.net/profiles/blogs/the-story-of-the-sacred-tree-1
Relationship with Medicine

- Reestablish our relationship with medicine
- Change our relationship with medicine people
- Develop a relationship with the spirit of substances and substance misuse and other health conditions
49 Days of Ceremony

- Traditional Indigenous Knowledge-based intervention for American Indian and Alaska individuals to:
  - mitigate the effects of trauma
  - holistically address health inequities
  - help individuals live full and balanced lives
49 Days of Ceremony
Our Process

- Develop lessons around 7 aspects of being a whole human that include:
  - Preparation
  - Journey
  - Reflection
49 Days of Ceremony
Draft Framework
Take Away

• Centering the voice of PWUD and Tribal communities
• Responding to the needs of communities
• Relational Worldview
• Culture is prevention and a buffer in mitigating the impact of trauma
• When we include community and those we serve in the development of healing programs, we have better outcomes.
Additional Considerations

- Speakers of other languages, refugees
- Latinx/Latino populations
- Asian communities
- Black/African American populations
- Individuals who are LGBTQ+
- Individuals with disabilities

Questions, Comments?
Case Presentations

• Critical component of every ECHO session
• Facilitates learning related to specific examples
• Peer-to-peer learning in a supportive and safe environment
• This is where we want to hear from you!
Case Presentation

“Alvin” is 37-year-old Native American male, referred for AZ Families FIRST program by the Dept of Child Safety (DCS) for substance use treatment. He reports substance use started at age 13 (marijuana and methamphetamine). He lives with girlfriend in a trailer in Coconino County (Flagstaff). Current barriers include unsafe housing (roof leaks), justice system involvement with over 30 arrests and 13 years in prison, challenges with employment due to legal history. Strengths are that Alvin has his GED and completed parole in 2020.

Alvin has a 3-month-old daughter with girlfriend “Morgan.” Baby was born exposed to meth and has been hospitalized in Phoenix (3 hours from Flagstaff) since birth due to liver issues and a mass that was surgically removed from stomach. Morgan has 5 other children.

Alvin is recommended for Intensive Outpatient (IOP) groups, case management, and random drug testing. He can participate in treatment virtually. In October he attended 2 of 13 available IOP groups. He decided he doesn’t want to participate virtually and declined further services, stating he is going to attend at Native Americans for Community Action (NACA) instead.

Main Question(s) from the presenter:
• What strategies are effective in supporting engagement in virtual services for patients in pre-contemplative stage of change?
• What are some strategies providers can use to partner with patients in their consistent engagement with treatment?
• How can we use telemedicine as a tool to remove barriers in rural communities, and also require a return to in-person services without it coming across as a punitive response to missed services?
Open Discussion
Discussion Conclusion
What's next?

Case Presentation Points

Next Session (Session 3) January 19, 11:30am-1pm ET
Topic: Improving capacity of primary care provider organizations to address mental health and substance use needs
