Welcome from the National Council for Mental Wellbeing!

3,300+ health care organizations serving over 10 million adults, children, and families living with mental illnesses and addictions.

- Advocacy
- Education
- Technical Assistance
Introductions

Carolyn Rekerdres, MD
Medical Director, East Texas Behavioral Health Network, NE Region, National Council for Mental Wellbeing, Medical Director Institute

Christina Arredondo, MD
Medical Director of Behavioral Health, El Rio Community Health Center, National Council for Mental Wellbeing, Medical Director Institute

Shauna Reitmeier, MSW, LGSW
CEO, Northwestern Mental Health Center, National Council for Mental Wellbeing, National Board
Introductions

Danica Love Brown, MSW, PhD  
Choctaw Nation of Oklahoma  
Northwest Portland Area Indian Health Board, Behavioral Health Programs Director

Kait Hirchak, PhD  
Eastern Shoshone  
Assistant Research Professor, University of Washington

Thomasine Heitkamp, MSSW  
Professor, University of North Dakota

Dennis Mohatt, MA  
Vice President for Behavioral Health, Western Interstate Commission for Higher Education

Safe Space Guidelines

**Setting the Foundation**
- We have been socialized to believe that it is not polite and not always comfortable to talk about health and racial equity and social determinants.
- We ask ourselves and participants to be mindful of assumptions and biases during this presentation.
- We ask ourselves and participants to be aware of multiple identities, backgrounds and perspectives in our virtual space.

**Requests**
- Be present & avoid multi-tasking
- Respect
- Listen to understand
- Time Out
- One person speaks at a time
Who is in the Room?

Didactic Presentation:
Improving Capacity of Primary Care Provider Organizations to Address Mental Health and Substance Use Needs

Christina Arredondo, MD
Medical Director of Behavioral Health, El Rio Community Health Center, National Council for Mental Wellbeing, Medical Director Institute
Learning Objectives for Today

After this webinar, participants will be able to:

• Understand the need for and rationale for enhanced primary care in rural settings

• Review and understand the different levels of integrated care.

• Understand the components of effective Team-based Care and how to leverage the model within your organization.

• Access resources, trainings, and additional information to assist you in advancing integrated care within your organization.
Rural Integrated Health Strategies

Christina Arredondo, MD
El Rio Community Health Center, Specialty BH
Intermountain, Desert Palms Clinic
SCOPE OF THE PROBLEM

• ACA appropriated money for Center for Medicare and Medicaid Innovation (CMMI) to spend on developing and testing innovative payment and delivery systems

• Many of these reforms assumed infrastructure and capacity not always supported in rural communities.

• Services are variable and problems of scale limit the feasibility of investing in needed infrastructure, including health information technology and workforce.

**COordinated**
- Key Element: Communication

**Co Located**
- Key Element: Physical Proximity

**Integrated**
- Key Element: Practice Change

---

**Behavioral health, primary care and other healthcare providers work:**

- In separate facilities, where they:
  - Have separate systems
  - Communicate about cases only rarely and under compelling circumstances
  - Communicate, driven by provider need
  - May never meet in person
  - Have limited understanding of each other’s roles

- In separate facilities, where they:
  - Have separate systems
  - Communicate periodically about shared patients
  - Communicate, driven by specific patient issues
  - May meet as part of larger community
  - Appreciate each other’s roles as resources

- In same facility not necessarily same offices, where they:
  - Have separate systems
  - Communicate regularly about shared patients, by phone or e-mail
  - Collaborate, driven by need for each other’s services and more reliable referral
  - Meet occasionally to discuss cases due to close proximity
  - Feel part of a larger yet non-formal team

- In same space within the same facility, where they:
  - Share some systems, like scheduling or medical records
  - Communicate in person as needed
  - Collaborate, driven by need for consultation and coordinated plans for difficult patients
  - Have regular face-to-face interactions about some patients
  - Have a basic understanding of roles and culture

- In same space within the same facility, some shared space, where they:
  - Actively seek system solutions together or develop work-a-rounds
  - Communicate frequently in person
  - Collaborate, driven by desire to be a member of the care team
  - Have regular team meetings to discuss overall patient care and specific patient issues
  - Have an in-depth understanding of roles and culture

- In same space within the same facility, sharing all practice space, where they:
  - Have resolved most or all system issues, functioning as one integrated system
  - Communicate consistently at the system, team and individual levels
  - Collaborate, driven by shared concept of team care
  - Have formal and informal meetings to support integrated model of care
  - Have roles and cultures that blur or blend
The Four Quadrant Clinical Integration Model

Quadrant II

- Behavioral health clinician/case manager w/ responsibility for coordination w/ PCP
- PCP (with standard screening tools and guidelines)
- Outstationed medical nurse practitioner/physician at behavioral health site
- Specialty behavioral health
- Residential behavioral health
- Crisis/ED
- Behavioral health inpatient
- Other community supports

Quadrant IV

- PCP (with standard screening tools and guidelines)
- Outstationed medical nurse practitioner/physician at behavioral health site
- Nurse care manager at behavioral health site
- Behavioral health clinician/case manager
- External care manager
- Specialty medical/surgical
- Specialty behavioral health
- Residential behavioral health
- Crisis/ ED
- Behavioral health and medical/surgical inpatient
- Other community supports

Quadrant I

- PCP (with standard screening tools and behavioral health practice guidelines)
- PCP-based behavioral health consultant/care manager
- Psychiatric consultation

Quadrant III

- PCP (with standard screening tools and behavioral health practice guidelines)
- PCP-based behavioral health consultant/care manager (or in specific specialties)
- Specialty medical/surgical
- Psychiatric consultation
- ED
- Medical/surgical inpatient
- Nursing home/home based care
- Other community supports

Persons with serious mental illnesses could be served in all settings. Plan for and deliver services based upon the needs of the individual, personal choice and the specifics of the community and collaboration.
COLLABORATIVE CARE MODEL

Primary primary care provider led team
Includes BH CM and Psychiatric consultant
Significant improvement in symptoms
Psychiatrist-BHCM meet weekly
Recommendations made to PCP
BHCM engages patients
BHCM provides targeted interventions
Psychiatrist can do eval if needed
PATIENT NAVIGATOR

• Can liaison between primary care and and behavioral health staff in co-located clinics
• Identifies those that need either primary care and behavioral health services and which is needed at that time
• Daily communications between the departments/organization, handles patient needs, participates in team meetings
TELEMEDICINE

• IN CLINIC
• CONSORTIUM
• HUB-AND-SPOKE
  • University of Kansas Medical Center’s Telehealth ROCKS program
MODELS FOR ACCESSING SERVICES

*Health Disparity Populations: Race/Ethnicity, Low SES, Rural, Sexual/Gender Minority
Other Fundamental Characteristics: Sex/Gender, Disability, Geographic Region

National Institute on Minority Health and Health Disparities, 2018
Skills based training for the community
Teaches how to identify and respond to mental health crisis
8 hour training course, can be certified to be a trainer
Developed in 2001 and adapted world-wide
How Mental Health First Aid for Rural Communities Can Help

- Reduces stigma
- Increases mental health and substance use literacy.
- Teaches an action plan to identify and respond to signs of mental illness or addiction in rural communities.
- Encourages an open dialogue about mental health in rural communities.
Help starts here
211 connects you to expert, caring help.
Every call is completely confidential.

Call 211 for help
Can't call us? Find a local 211
211 Health Check
Free Mental Health Check-Ins With A Person Who Cares.
All calls are confidential.
DIAL 2-1-1

- Different ways to utilize the service: text, chat, call, search online
- Disaster resources, food and shelter, mental health crisis, employment supports, elderly and disability supports
- Speak to a live person
 Millions Served

People can contact 211 by phone, text, and online. In 2020, the 211 network:

• Answered more than 18.5 million phone calls

• Responded to more than 1.5 million texts, web chats and emails

• Made more than 27.8 million total connections to help.

• Was designated by governors and health departments in 32 states as the official COVID-19 resource line.
Rural Community Health Gateway

The Federal Office of Rural Health Policy (FORHP) supports a range of programs and tools to help rural communities improve the health of their residents. This section highlights a number of these resources.

STEP 1: **Identifying an Intervention**
You've identified a need in your community but are unsure of how to address it.

STEP 2: **Funding an Intervention**
You've identified a rural health intervention but are unsure how to fund it.

STEP 3: **Evaluation and Sustainability**
You want to make sure that the program you're planning will last and meet the needs of your community and your funder.

STEP 4: **Dissemination**
You want to share your experience with other rural stakeholders and help build the rural evidence base.
Resources

- Six Levels of Integrated Care *(currently being revised)*
- Quick Start Guide to Behavioral Health Integration
- General Health Integration Framework
- High-functioning Behavioral Health Team-based Care
- MAT Readiness and Implementation Toolkit
- SBIRT Change Package
- Free online trainings on Integrated Care
- Rural health Info
- AIMS Center
Questions, Comments?
Case Presentation

Annette Darkenwald, LCSW, MSW, BHC Health Program Coordinator & Jenni Leininger, RN, Regional Clinical Coordinator
Billings Clinic Regional Network (MT)

Our health system consists of a large tertiary hospital and a network of 15 affiliated (but independent) Critical Access Hospitals. All members of the network are having difficulties with employee retention and recruitment, especially staff providing bedside care. All members continue to face challenges in supporting the wellbeing and mental health needs in our community. As we struggle to meet the needs of our patients, we have become acutely aware that our employees are suffering. Several member facilities of our health system have experienced employee suicides, and all are concerned with the mental health of the workforce. Member sites feel that finding ways to provide resources for employee mental health needs and address secondary trauma experienced on the job is of the upmost importance for resilience and wellbeing.

The large tertiary health center has an Employee Assistance Program (EAP) that is overwhelmed by current demand, resulting in delays in providing counseling and other services to employees. Most of the Critical Access hospitals in the network do not offer EAP.

Main Question:
Have health systems used integrated behavioral health resources to quickly address employee crisis and mental health needs?
Open Discussion in Breakout Groups
Discussion Conclusion
What's next?

Next Session (Session 4) March 16, 11:30am-1pm ET

Topic: Innovative community partnerships to improve mental health and substance use service delivery and reach
Resources

• PRISM Collaborative – Culturally Adapted Evidence-Based Substance Use Disorder Treatment for American Indian and Alaska Natives
• Project ECHO
• Mental Health and Rural America: Challenges and Opportunities
• Mountain Plains Prevention Technology Transfer Network
• Mountain Plains Addiction Technology Transfer Network
• Mountain Plains Mental Health Technology Transfer Network
• National Association for Rural Mental Health
• National Rural Health Association
• National Association for Rural School Mental Health
• Rewarding Recovery Study
Upcoming CoE Events:

**CoE Office Hours:** Understanding Black & African American Experiences in Mental Health & Substance Use Services
