Integrated Approaches for Addressing Older Adults and Behavioral Health Needs

Many older adults experience multiple chronic conditions and also struggle with depression, anxiety, substance use, or other behavioral health challenges. Integrated care models bring together medical, behavioral health, and other social services to provide comprehensive and coordinated care that addresses the unique needs of any individual as they age.

This session will provide you the opportunity to engage directly with our expert panelists and gain a deeper understanding of the approaches and strategies discussed in the webinar. Our panelists will be on hand to address your questions, share their experiences, and provide further insights into the challenges and opportunities associated with addressing aging and behavioral health needs in older adults. Don't miss out on this chance to learn from industry leaders and gain valuable knowledge that you can apply in your own practice.
