Evidence Meets Innovation: The Crucial Role of Clinical Research in AI Development for Behavioral Health

July 16, 2024

Agenda • Speaker introductions

eleos

- Al core concepts review
- Defining characteristics of evidence-based AI
- Moderated expert discussion
- Audience Q&A

Meet Your Speakers

Dennis Morrison, PhD Clinical Strategist Morrison Consulting

MORRISON CONSULTING

Shiri Sadeh-Sharvit, PhD Chief Clinical Officer Eleos Health

Joe Parks, MD Medical Director National Council for Mental Wellbeing

NATIONAL COUNCIL for Mental Wellbeing

Ashley Newton CEO Centerstone Research Institute

Live Poll

What is your stance regarding AI-based tools in your organization?

What is AI?

The capacity of computers or other machines to exhibit or simulate intelligent behavior. How is AI created?

What are the benefits in behavioral health? What is the role of clinical experts?

LLM training and testing (similar to creating a new psychological test). Faster, more compliant documentation, deep clinical insights, and different perspectives on care (*like an AI co-therapist*). Specialized clinical experts are involved in AI design, implementation, testing, and research.

3 Signs of a Clinically Sound AI Model

Bahar, L., Rego, S. A., & Sadeh-Sharvit, S. (under peer-review). Use of Natural Language Processing to Identify Climate Anxiety in Therapy. https://doi.org/10.31234/osf.io/5bhax

Sadeh-Sharvit, S., & Hollon, S. (under peer-review). Al in Behavioral Healthcare: A Clinician's Roadmap. https://doi.org/10.31234/osf.io/z56vg

Key Scientific Standards for AI Tech Vendors

Evidence-Backed Value Statements Publication of Peer-Reviewed Research

Clinician and Expert Involvement

Continuous Improvement

A platform designed for behavioral health must be informed and shaped by solid data from the field in which it is operating. The best healthcare tech companies commit to publishing their findings in esteemed, peer-reviewed scientific journals. Behavioral health providers and experts must be deeply involved in research and product development efforts for behavioral health technologies. Like science, technology products should never be static—they must evolve through cross-pollination and continual updates.

A Platform Purpose-Built for Documentation and Compliance in Behavioral Health

Seamlessly embeds within your EHR and telehealth workflows

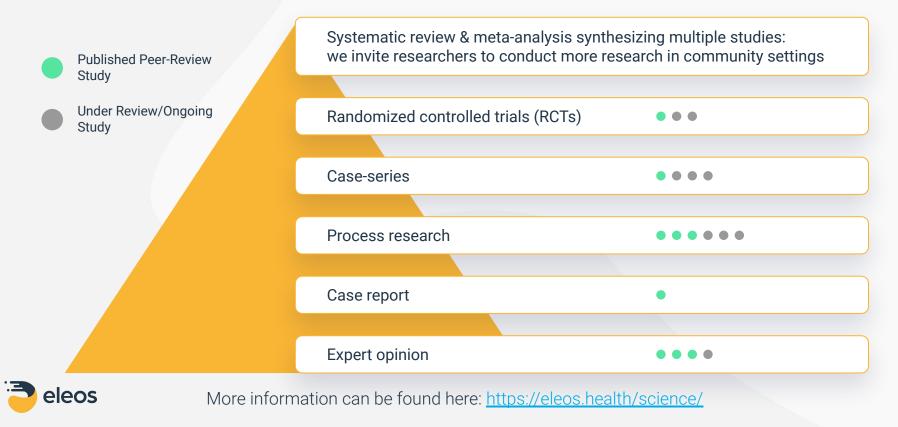

Compatible with web-based EHRs and no APIs required

We Live to Serve Our Growing Base of Customers

Live Poll

What is your stance regarding AI-based tools in your organization?

What is AI?

The capacity of computers or other machines to exhibit or simulate intelligent behavior

How is AI created?

LLM training and testing (similar to creating a new psychological test).

What are the benefits in behavioral health?

Faster, more compliant documentation, deep clinical insights, and different perspectives on care (like an AI co-therapist).

What is the role of clinical experts?

Specialized clinical experts are involved in AI design, implementation, testing, and research.

What is AI?

How is Al created?

The capacity of computers or other machines to exhibit or simulate intelligent behavior. LLM training and testing (similar to creating a new psychological test). Faster, more compliant documentation, deep clinical insights, and different perspectives on care (like an Al co-therapist).

What are the

benefits in

behavioral

health?

What is the role of clinical experts?

Specialized clinical experts are involved in Al design, implementation, testing, and research.

- What is AI?
 - The capacity of computers or other machines to exhibit or simulate intelligent behavior
- How are AI Tools created?
- Computers are trained on large databases called Large Language Models (LLM)
 Then they are tested to see if they do what they were trained to do.
 Somewhat similar to creating a new psychological test.
 How does it help behavioral health professionals?
 Expedited charting for deskbound and mobile workers
 Different clinical perspectives (like an Al co-therapist)
 What role(s) do clinical professionals play in commercial AI products?
 - Design Ο
 - Implementation Ο
 - Research 0

3 Signs of a Clinically Sound AI Model

Strength of Dataset

What is the quality and relevance of the data on which the AI is trained? Was it designed for BH?

Expert Review

Are data review and analysis led by therapists with substantial, relevant clinical experience?

In-house Data Processing

Is client and therapist information encrypted, secure, and always private? Are strategies to mitigate algorithmic bias employed?
